Everything You Need To Know To Get That Lean, Defined Body You've Always Wanted

Jeni achieved the body she wanted using this system losing over 50lbs...You Will Too!

CONGRATULATIONS!

You are just a few quick steps from becoming the very next SUCCESS STORY!

Your Jump Start Nutrition Plan will make reaching your fitness goals and living healthy easier.

You are going to be surprised at how easy this nutrition plan will fit into your daily lifestyle and how fast the pounds and inches will fly off as you build strong, sleek, lean muscle.

This simple, easy to follow nutrition plan has helped hundreds of people lose unwanted weight, melt fat, lower blood pressure, lower cholesterol levels, have healthier looking skin and have more energy then ever before...and it WILL work for YOU too!

Hear me out on this. Remember, we are breaking bad habits and creating healthy new ones. The first 21 days can be the hardest. It takes that long for you to lose your unhealthy sugar and fat cravings.
The 7 Tips (Secrets to Getting Lean and Healthy)

Here are your simple tips for quick, easy, permanent fat loss and lean muscle-building success.

**Tip #1 - 21 Day Mind Set** – Don’t cheat on your nutrition plan for 21 days. It takes the brain 21 days to reset itself and create a new habit. When you want to make a change, don’t tell yourself that you are doing it for life; tell yourself that you are going to try it for only 21 days. Now, when you have completed this for 21 days, your conscious mind has the choice of stopping it or carrying on, or so it thinks. Your neural pathways have formed already and you will more than likely continue with your new habit. You will have seen the benefits along the way and your subconscious will want to continue if it has been beneficial.

**Tip #2 - Be Prepared** – Most of the time, women eat poorly because they did not bring food with them or did not prepare.

- **Moms** — Time is a precious commodity. Between taking the kids to school, dance or baseball practice, you can barely get a meal in here and there and when you do, it’s usually leftovers from your kid’s plate. Throw the leftovers away; don’t feel obligated to eat it. Make sure when you get something to eat for your child, get something for you, too. Don’t say, “I’ll just eat what they don’t.”
- **Ladies** — The one major complaint is, “I had nothing to eat so I grabbed a bag of chips.” Be prepared! Always carry something with you then you have no excuse. And if you’re meeting the girls for an evening out, eat before you leave the house and take your snacks!
- Get a rice cooker and keep some long grain, brown Basmati rice cooking on your counter. Also pre-cook some chicken or fish. It will only take a few minutes to prepare 1 or 2 meals and grab a few snacks to bring with you.
- Take five minutes to plan out what you are going to eat the night before.
- Bring healthy snacks with you like apples and almonds (see snack section). If you can, bring some Tupperware containers or a cooler with healthy meals. Keep it simple. If you don’t feel like bringing food, then plan out some healthy restaurants or stores that you can eat at (see eating out section).
Tip # 3 - Keep a food diary for at least one week — Write down everything you eat and drink. You have to write it down right before the food or drink is consumed. **By writing it down first, you will have a moment to stop and think if this decision is going to belly fat or pack it on.**

- Have someone agree to review your food journal everyday. Make an agreement that for each day you do not give them your journal, you owe them $10.00 and every time you cheat, you owe $1.00. Doing this will help keep you accountable.

Tip # 4 - The Magical Glycemic Index - Not all carbohydrate foods are created equal; in fact, they behave very differently in our bodies. The glycemic index or GI describes this difference by ranking carbohydrates according to their effect on our blood glucose levels. Choosing low GI carbs - the ones that produce only small changes in our blood glucose and insulin levels - is the secret to long-term health, reducing your risk of heart disease and diabetes and is the key to sustainable weight loss.

- Eat every 3 hours. This will keep your metabolism and energy on turbo mode so the fat melts off. This is also a great way to curb the kind of extreme hunger that will have you making the kind of bad choices you will quickly regret.

Tip # 5 – Eat Real Food to get Lean — Ever watch the Discovery Channel? See the tribes in the jungle. You never see anyone who is fat; even the elders have six-packs. Why? They eat real food and stay active. Stay away from poison- (eeeh heem) I mean processed foods. The food companies strip out the good stuff like fiber and nutrients. What you have left is a food that has way more calories than normal. Plus, the worst part is that they are high glycemic, which means our body treats it like sugar. The good news is once you cut out these processed foods for a couple of weeks, you lose your cravings. I’m not saying to not have a life. I eat burgers, pizza or have a piece of cake from time to time.

- Watch out for foods and drinks that people think are "healthy" like bagels, pretzels and sports drinks like vitamin water. Consuming these is like eating table sugar.

Tip # 6 – Warning: artificially sweetened "sugar free" foods and drinks make you fat - Did you know that most foods labeled as "sugar free" or "low carb" actually contain fattening artificial sweeteners, sugar alcohols and other additives that create a hormonal disaster inside your body, actually causing your body to store more belly fat and increase cravings!

Tip # 7 - Eat Snacks, Don’t Be Starving — Use snacks and drinks (see snack section) that’ll fill you up, and curb your cravings but won’t add significant extra calories. When you feel starved, you’ll crave foods that’ll add unwanted body fat and will make you feel really guilty.

- When you get a late night sweet tooth, try a delicious homemade Chai Tea. This is how I make it. Put two Yogi Mayan Cocoa Spice tea bags in a cup (I use a big 20oz ceramic cup) of boiling water. Add a tiny dash (it’s very sweet) of KAL brand Stevia. Let it steep for a few minutes then add a little ‘no sugar added’ Silk Soy Milk.
- Cut up cucumber, jicama or celery. Munch away all you want!

**What if you go out to eat?**

If you eat out, here are some tips:

Eat before you go out so you are not starving.

Ask for no bread or tortillas chips. When they bring it to the table, have them take it back, or if that’s not possible, just don’t eat it.

Look at the menu closely and ask your server what comes with your meal. If there are tempting items that you don’t want to eat, request for the server to leave them off.

Some restaurants are now getting savvy with a health conscious section on the menu; keep a look out when you are looking through a menu.

Drink water or tea (unsweetened)

Stop eating when you’re full. Let the server take your plate so you don’t keep stuffing yourself.

No dessert – Eating something that has truckloads of sugar, fat and calories after you just ate a complete meal is a ridiculous tradition. Let’s put an end to this madness!
**Restaurants**
Regardless of any restaurant you choose, there is always an option to grill or bake, just ask your server.

- Order grilled or baked chicken breast, fish or steak. Ask for steamed vegetables and/or vegetable soup.
- SPECIFY – no butter, no oil.
- Only order what you intend to eat.

There are a lot of restaurants to choose from; keep these tips in mind when selecting a place.

**Mexican Food**
The majority of Mexican restaurants serve chips and salsa when you sit down. Don’t get out of control with it; send it back so you don’t stuff yourself with it before your meal arrives.

- Order two to three grilled chicken or fish tacos on corn tortillas. You can add salsa, hot sauce, guacamole and a little cheese
- Try ceviche (fish mixed with tomatoes, cilantro, and lemon, recipe may vary according to restaurant) or a tostada salad; leave out the dressing and use salsa instead

**Japanese Food**
Avoid the tempura and anything else that is deep-fried; the majority of sushi rolls come with rice, ask your server to leave it out.

- Order Sashimi (no rice),
- Edamame,
- Hand rolls with no rice (they’re pretty good), I like salmon and tuna. You can also ask for vegetable
- Sashimi Salad
- Miso soup
- Ask for low sodium soy sauce
Ultimate Women’s Jump Start Nutrition Plan

**Italian**
Beware of the bread, have the waiter take it away. Now a day, most Italian restaurants have a healthy or low carb section in their menus.

- Order high fiber low carb pasta with chicken or fish and marinara or tomato sauce.
- You can also order a grilled chicken salad with Italian or balsamic vinegar dressing.

**Fast Food**
This is definitely the least desirable choice when getting healthy and lean. There are quite a bit of choices on every corner but these are my top 3 suggestions of places to eat if you really don’t have a lot of time:

- Baja Fresh – Your choice of chicken, fish (not fried), steak tacos. Make sure they are in corn tortillas with salsa you can also have guacamole. Make sure you don’t eat the tortilla chips that usually come with it.
- Rubio’s – They have great healthy chicken, fish and meat tacos and burritos. Make sure you don’t eat the tortillas chips that usually come with it.
- El Pollo Loco – Order the chicken breast but remove the skin, corn tortillas, steamed veggies and salsa
